

How to keep Your Digital Footprint

APPROPRIATE & SAFE

NUMBER ONE

Check all your social media platforms and check the privacy settings and put them on private if you don't want them being seen. Also so you have more control on who see it.

NUMBER TWO

Delete/deactivate any old accounts you don't want anymore or for people to see. As well as pictures that may be inappropriate or embarrassing for yourself

NUMBER THREE

Don't post things you wouldn't want certain people to see (ex grandma, parents) or you don't want it to go up on google images. As well as deleting pictures that may be inappropriate or embarrassing for yourself.
