

1. Describe the digital pillar you are promoting.

- Perseverance is the digital pillar that I choose to do for this assignment. Perseverance is not giving up easily; even in difficult situations, it is necessary to keep on going until you achieved your goal.

2. Connect and explain how you or someone you admire online has applied this pillar to their digital life.

- I have applied this pillar online, particularly for learning. It is important that I acknowledge perseverance online, especially for learning and limiting my time on screen, which is also needed to complete my tasks.

3. Explain why this pillar is important to you in creating a positive online reputation.

- Perseverance would keep me continuing to do what I want, particularly like fighting/talking about social issues, rights and stories.
