

## Leadership

Leadership is being a good role model and influence on others around you. I would like to say I am a leader to many people who may be younger than me, or the same age as me. I try to set a good example to my younger cousins and siblings which I hope they can try doing the same, as I also encourage my friends to do the best they can as it shows leadership. I have used leadership in my digital life by supporting people when they need it or reposting messages to share. I chose this out of all the pillars since leadership is important to me for so many reasons. Leadership always gets passed on from generations after generation, from the people you choose. It is used as strong message however you would like it to be used. I chose leadership as I have had many leaders from online and in person. Leadership is positive in many forms as it brings out the best of a person out to follow,
